

Where the **agentic stack** is being built.

We Built an Agent, We Shipped a Compiler. Here's Why.

Joel Verezhak | Observability Architect, Grafana Labs

Hi, I'm Joel.

**Physics.
IT.
Observability.**

Dad of three.

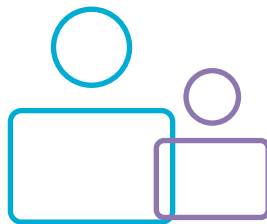

What we're here to help with

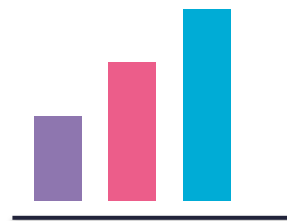

Grafana Labs

Understand systems.
Keep them reliable.

Observability Architects

Long-term
technical partners

Customer outcomes

Progress that
matters to them

What does success look like?

Why anything?

What needs
to improve?

Why Grafana?

How can
we help?

Why now?

Why does it
matter now?

I'll just add another rule.

500

lines of instructions

Same account. Ten attempts.

**Six got the customer's
stated target wrong.**

1 BIG SKILL

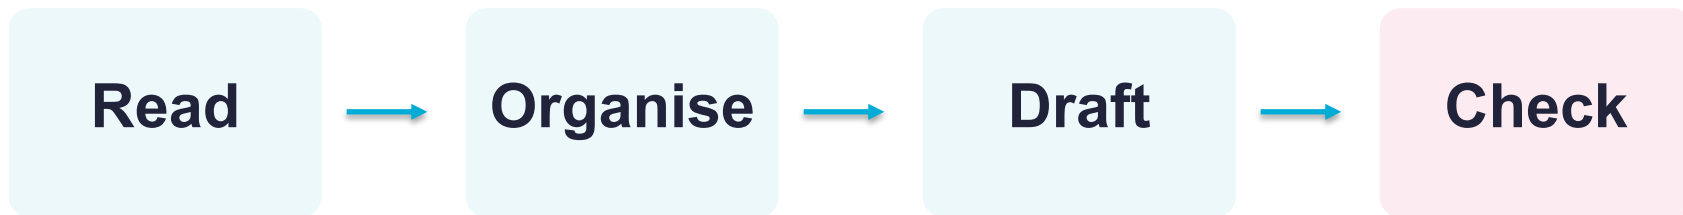

2 STRUCTURE

3 ENGINE

4 SMALL SKILL

Let's give it some structure.

Python scripts. Agreed data. A judge.

It felt like gaining control.

1 BIG SKILL

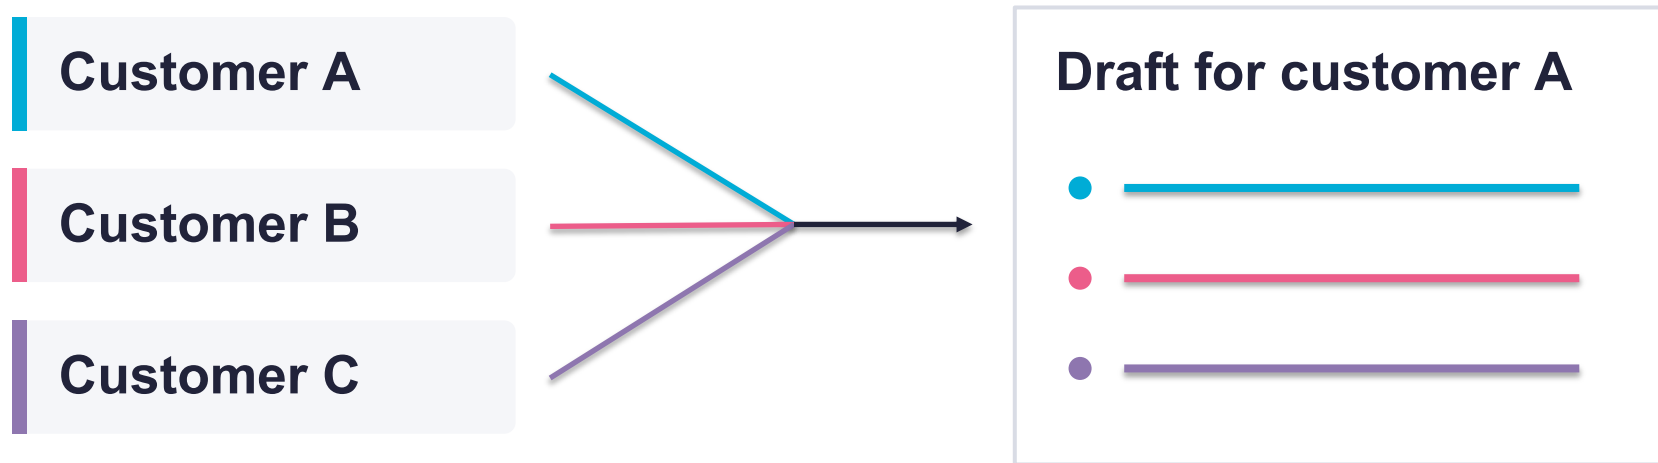

2 STRUCTURE

3 ENGINE

4 SMALL SKILL

The wrong customer.

A few test accounts → hundreds of accounts.

Internal draft. No customer received it.

1 BIG SKILL

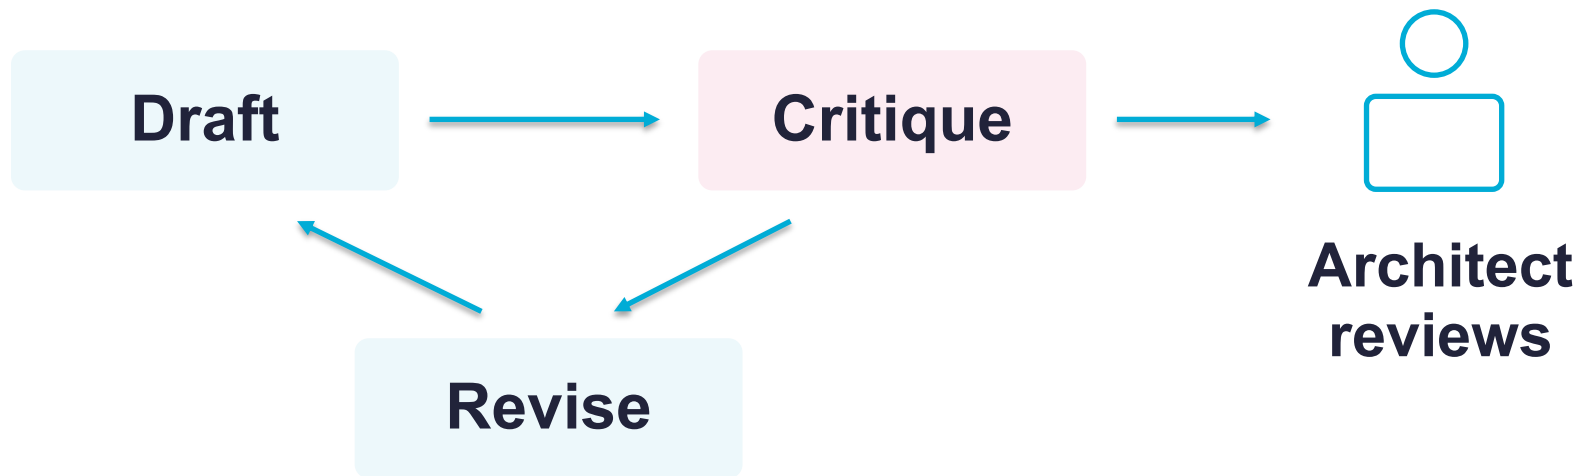

2 **STRUCTURE**

3 ENGINE

4 SMALL SKILL

Now it has a critic.

The success plan engine

1 BIG SKILL

2 STRUCTURE

3 ENGINE

4 SMALL SKILL

Then we had to run it.

COLLABORATION

**Easy to run.
Harder to
contribute.**

PROVIDERS

**New provider.
New module.**

More to maintain.

CLAUDE API

Temperature: 0

**Incompatible with
extended thinking.**

**I'm an OA.
I have customers to look after.**

1 BIG SKILL

2 STRUCTURE

3 **ENGINE**

4 SMALL SKILL

Understand the customer first.

BEFORE

Plan template

Find things to fill it

The first facts weren't always the important ones.

AFTER

Be curious.

Understand.

**Open template.
Write the plan.**

Progressive disclosure: the template comes later.

1 BIG SKILL

2 STRUCTURE

3 ENGINE

4 **SMALL SKILL**

Back to a skill.

54

lines

One query.
Human review.

Get the identity. Keep it.

New provider? Switch harness.
